

# Flexible fixed installation cable/Power cable PS flexible PVC material power cable

## sketch map

## Technical parameter:

Conductor: Multi-stranded bare copper wire stranded conductor.  
 Insulation: PVC  
 Core wire color: color differentiation or black core wire white numerical identification.  
 Core wire stranding: twisted together at the optimal pitch.  
 Outer sheath: PVC, color can be matched according to customer requirements.  
 Minimum bending radius: occasional movement: 15xd; Fixed installation: 4xd.  
 Operating temperature range: Mobile installation: -5°C to +70°C; Fixed installation: -20°C to +80°C  
 Rated voltage: 300/500V  
 Test voltage: 4000V

## Product characteristics:

Has higher electrical performance, higher flexibility, smaller cable outer diameter, and saves installation space.  
 Flame retardancy in accordance with IEC 60332-1-2.

## Application scope:

Equipment installation engineering, industrial machinery, heating and air conditioning installation systems, power stations;  
 Suitable for dry or humid spaces subject to moderate mechanical loads;  
 Suitable for fixed installation and occasional bending situations with free and discontinuous reciprocating movement without tensile load;  
 Suitable for torsion applications, typical applications are in the crossover area of wind turbines (WTGs).

## Product standards:

Material code	Number of cores and nominal cross-section of conductorsmm <sup>2</sup>	Approximate outer diameter [mm <sup>2</sup> ]	Cable weight kg/km
